DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 6, 53-56, 60-65, and 67-68 are rejected under 35 U.S.C. 102(b) as being anticipated by StockWatch System.

The reference teaches that the SWAT System tracks real time market data for abnormal events and transmits an alert message upon that event. One such event is said to be a locked or crossed market. See pages 1-11, where the creation of the file reads on transmitting an alert message.

The System known as StockWatch makes no mention of the features of Claims 5, 57, 58, 59 and 66. This StockWatch System is believed to be a system designed for the assignee of the instant application. Assuming that these features were not inherent in the StockWatch system, these features render the claims allowable.
